Subject: Segment 4/5 Response Proposal

Mary -

Unfortunately, I have had limited internet access up here but I have had a chance to review the revised RP 4/5. I am not up to providing a detailed response using my iPhone. I am, however, comfortable with EPA issuing a similar letter to Dow with the similar caveats that you provided for RP3 which essentially deferred many of the issues to later in the process while providing to opportunity to continue to make progress on SMAs and BMAs that EPA, DEQ, and Dow agree on. As this is an iterative process we note that there may be additional areas, beyond those identified in the revised RP 4/5 RP that require additional investigation/remediation. In this case we have not reviewed the SCOI issues but the State of Michigan comments will remain the same as previously provided to EPA on these issues.

Please let me know if you have any questions or concerns regarding this communication. I appreciate your continued patience with me as I transition from the Project Coordinator position to my new role.

Thanks and I look forward to talking with you next week.

Al
